**BioMedix Completes Asset Acquisition of PodMed and Leum Software, Inc., a leading provider of Electronic Health Record and Practice Management Software**

St. Paul, MN, September 1, 2009 — BioMedix Vascular Solutions, Inc., a leader in vascular diagnostics and information services for hospitals, health systems and physician offices, announced that it has acquired PodMed and the assets of Leum Software, Inc., a leading provider of Electronic Health Record (EHR) and Practice Management software for physician offices.

“The acquisition of PodMed and ongoing involvement of founder and chief architect, Scott Leum, reinforces our commitment to collaborative care models enabled by integrated hardware and software solutions,” stated John Romans, BioMedix CEO. “The push for EHR integration into physician offices makes this a unique opportunity for our stakeholders and broadens the scope of services and products we are able to deliver to our clients,” added Mr. Romans.

“Integrating PodMed with the resources of BioMedix will not only allow us to offer world class service and support to our combined customer base, but will also position BioMedix with a full service EHR, charting, electronic script writing, billing and inventory management application,” represented Scott Leum, founder of PodMed and, previously, MediNotes. “It is a pleasure to join the BioMedix team as they share my commitment to delivering high quality products and services to the podiatric physician marketplace.”

**About BioMedix**

BioMedix Vascular Solutions, Inc. provides the only integrated suite of hardware, software and online services designed to cost-effectively detect Peripheral Arterial Disease (P.A.D.) and Chronic Venous Insufficiency (CVI). Vascular specialists, primary care providers, hospitals and health systems use our products to identify these patients. Our devices and software reduce mistakes, provide data for sound analysis, build practice revenue and streamline reimbursement while providing a platform that supports the continuum of care and increased quality outcomes.
